PROFESSIONAL EXPERIENCE

Macquarie Group

Sydney, NSW

Data Business Analyst, Macquarie Capital - Project Delivery

September 2025 - Present

- Spearheaded the integration and ingestion of core Salesforce data into the central data platform, establishing a foundational CRM and deal data products by successfully onboarding 21 tables and processing a daily throughput of 2M+ rows.
- Lead end-to-end data delivery for internal FP&A and Financial Operations teams, discovering and documenting current-state processes to translate complex financial workflows into strategic dashboard and visualisation requirements.
- Drive operational efficiency by identifying automation opportunities, migrating manual Excel-based workflows into properly governed data sets and enterprise solutions on the strategic data platform.
- Established automated SharePoint ingestion solutions by collaborating cross-functionally to standardise document storage and design backend pipelines to ingest into the data platform, reducing manual handling and data fragmentation.

Data Solution Designer, Corporate Operations Group - Data and AI

October 2022 - August 2025

- Performed comprehensive business analysis on an enterprise-wide transformation project to operationalise the new Data Management Standard through the implementation of the Data Management Tooling solution (Collibra).
- Collaborated with internal and cross-Group stakeholders to define business and data requirements to optimise Collibra, enabling Groups to effectively meet data management and governance obligations, including CPS 230 and CPG 235.
- Employed semantic data modelling and best practices to define the target metamodel and business rules of Collibra, translating business requirements for 22 asset types to the development team for the initial release.
- Utilised Sparx Enterprise Architect to map the semantic model of critical business processes and document enterprise-wide data and risk frameworks.
- Defined and developed key metrics to support prerequisite data migration activities from the current-state Collibra to target-state, utilising SQL and Excel to assess Macquarie's data management maturity and quality.
- Facilitated monthly forums as a central advisor for implementing data governance frameworks across Macquarie's eight divisions, aligning practices with industry standards and collaborating with senior stakeholders and Group Data Office teams.
- Supported ad hoc data analysis and prepared insights to guide senior management decisions and support key risk indicators.

Westpac Group (via Tata Consultancy Services)

Sydney, NSW

Analyst Programmer, Data Operations & Enterprise Services - Data Quality Management

March 2021 - October 2022

- Deployed enterprise data quality rules, capturing results in a central repository and ensuring close alignment with business and platform requirements to support data governance, manage data risk, and validate financial and accounting concepts.
- Developed data quality rules end-to-end in Informatica Developer and Dataiku to measure and monitor critical data elements and coordinated monthly execution and reporting through Control-M orchestration.
- Delivered Qlik Sense and Power BI dashboards from inception through to delivery, tailored for Business Data Managers and Executive Management to enable data-driven decision-making and satisfy data risk obligations.
- Developed SQL-based test cases and executed unit testing, integration testing, and user acceptance testing within large financial data sets to ensure data quality rules and solutions met business requirements.
- Produced standard operating procedures (SOPs) and customised Excel solutions to support business-as-usual (BAU) activities, resulting in a time savings of several hours per month.

EDUCATION

University of Technology Sydney

Sydney, NSW

Bachelor of Business - Major in Finance

March 2021

Bachelor of Science in Information Technology - Major in Business Information Systems Management

GPA: 5.84/7 | WAM: 77.94
